AGILISYS

Cloud Strategy and Implementation

The skills, experience and capacity to unlock your cloud potential

We help organisations improve their services by delivering the skills, experience and capacity needed to make the right cloud decisions

Is hybrid cloud the right model? What platform best fits my needs? How much is it going to cost? Organisations are navigating a vast array of complex cloud decisions. Our Professional Cloud Services have been developed to bring clarity to the cloud. We deliver the skills, experience and capacity necessary to develop the right strategy and methodology to make cloud a success for your organisation.

Overview

Agilisys' capabilities have been designed and optimised for the public sector, honed over many years and numerous successful cloud migrations. Minimise the time, cost and risks traditionally associated with transformation by harnessing our expertise to control and manage cloud complexity.

Agilisys provides honest, impartial advice which never assumes that the cloud is the only, or even the best, answer – although it often is. Instead, we adapt to the specific needs of every customer, while also securing support for transformation across their organisations.

Unlock the cloud's potential.

Key features

Experience

With nearly two decades' experience in providing technology solutions for the public sector, we've developed the right methodologies and processes to ensure effective & timely delivery.

Skills

Our teams have a wide range of cloud expertise which combines to solve complex problems and deliver really profound transformation.

Capacity

By adding capacity to your team, our combined skills and experience can deliver solutions from within the organisation that make change happen.

Professional Cloud Services

Unlock the cloud's potential in your organisation to deliver efficiencies and innovation sooner

Our Professional Cloud Services have been designed to support organisations at every stage of the cloud journey. From initial IT strategy development and operating model design, right through to the optimisation of your cloud environments and applications to maximise their performance and productivity.

Developing an effective strategy in this shifting landscape is not easy. Insight and experience is vital to avoid mistakes with cloud technology adoption, new operating models and the latest workplace and hosting technologies.

Our Professional Cloud Services have been designed to unlock an organisation's cloud potential by delivering the right experience, skills and capacity to make change happen.

Discover

Understand cloud options available and develop a plan which aligns to your organisation's vision and objectives.

Outcomes

- Map your goals to IT strategy and technology implementation.
- Win the support of the IT team and other key influencers.
- Plan the journey from current to future state.

Migrate

Outline the key steps in the preparation for a controlled, low risk, fast and effective cloud migration.

Outcomes

- A safe and assured migration into the cloud.
- Minimal disruption during migration.
- A structured process for testing, acceptance and handover.

Optimise

Continual optimisation needed to reduce the cost of services, improve performance and unlock new capabilities.

Outcomes

- Drive efficiency of cloud services.
- Change operational mind-sets to "only what's needed".
- Embrace new, enhanced capabilities.

Agilisys, an employee owned organisation, is one of the UK's fastest growing and innovative cloud and digital transformation specialists, enabling organisations to adopt technologies, platforms and processes that promote new ways of working. An established partner for both the public and private sector for nearly two decades, we have earned a strong reputation and hold deep domain expertise delivering change and innovation, particularly within local and central government.
